

## *Sensitivity Removal Technique (SRT)*

SRT is the latest in a series of approaches that are intended to help the body normalize function through the effect on the energy system of the body. SRT incorporates aspects of [Neural Therapy](#), NAET, BioSET, O-Ring Testing, NET, Homeopathy, and Acupuncture. As a member of this therapeutic approach, the assumption is that disease is the result of a disruption of the flow of energy through the body. Correcting this problem will result in improved health.

SRT can treat a multitude of problems, and has been shown to have a profound effect on the basic functions of the immune system, physiological mechanisms, the nervous system, emotional blocks, biochemical reactions, and others. Therefore, it can be used for the treatment of all conditions, and provides excellent relief for allergies. One of the main benefits of SRT is the ability to test for and treat multiple items at a single session. This provides for a rapid rate of improvement for most people, with a full course of treatment usually taking 12-15 visits. There are no known side effects, although detox reactions can occur. Due to these factors, I consider SRT to be one of the foundational therapies that we offer, and it should be included as one of the first line therapies in treatment.
